Profile Overview

I am a **Laravel, Vue.js, and React.js expert** with 8 years of experience in Laravel development. I follow a **Test-Driven Development (TDD)** approach, utilize **Git version control**, and work with a **Docker-based containerization workflow**. Over the years, I have developed multiple applications and custom packages for Laravel.

Laravel packages I have built:

- [Asymmetric Encryption](#)
- [Laravel Neo4j Starter](#)

I am well-versed in **Object-Oriented Programming (OOP)** and have extensive experience with both back-end and front-end development. **Laravel** is my primary PHP framework, while I use **Vue.js** and **React.js** as my main JavaScript frameworks.

Key Skills

- **Laravel (PHP Framework)**
- **VueJS and ReactJS (Javascript Framework and Javascript Library)**
- **Tailwind, Bootstrap and Foundation (CSS Framework)**
- **JQuery, NuxtJS, NextJS, Livewire, Wordpress, Docker, AWS, Github Actions.**

Work Experience

Upwork (CA, United States of America)

[Upwork Profile](#) (Profile Link)

Senior PHP Full Stack Developer, Expert in Laravel, VueJS, ReactJS, WordPress

April 2013 – Present

- **Back-End Expertise:** Advanced PHP development using **Laravel (MVC architecture)** with strong focus on scalability, maintainability, and test-driven workflows.
- **Front-End Development:** Proficient in **Vue.js, React.js, and jQuery**, delivering responsive UIs with **Tailwind, Bootstrap, CSS3, and HTML5**.
- **WordPress Engineering:** Deep experience customizing themes, developing plugins, and creating tailored CMS solutions for enterprise and e-commerce.
- **Package & API Development:** Skilled in **building reusable Laravel packages**, integrating third-party services, and developing **RESTful APIs**.
- **Database Management:** Expertise in **MySQL schema design, optimization, and stored procedures** to handle large-scale datasets efficiently.
- **Full Project Delivery:** End-to-end execution of **large web development contracts**—from architecture design and coding to deployment.
- **UI/UX Implementation:** Convert **Figma, Adobe XD, and PSD designs** into fully functional, pixel-perfect applications.
- **Modern Tech Stack Mastery:** Leverage Laravel, Vue.js, React.js, and WordPress to enhance application **quality, performance, and security** through robust architecture and clean code practices.

Arizto (New Zealand)

www.arizto.co.nz

January 2025 – September 2025

Senior Backend Engineer (Laravel) - Real Estate Technology Platform

- Developed Laravel leaderboard system with stored procedures for agent performance tracking across leads, appraisals, and property sales
- Built complex query repository patterns handling real estate metrics including conversion rates, premarket listings, and sold properties
- Implemented CSV export functionality with dynamic filtering for agent performance reports and data analytics
- Created database optimization strategies using MySQL stored procedures and query builders for large real estate datasets
- Designed filter repository architecture supporting multi-dimensional queries across regions, districts, suburbs, and date ranges
- Developed data validation systems using Laravel validators for request handling and parameter extraction
- Built property listing management with revision tracking, status changes, and sale contract integration
- Implemented date range calculation utilities supporting various time periods and timezone handling for reporting
- Tech Stack: Laravel, PHP 8+, MySQL, Stored Procedures, Query Builder, CSV Export, Git

Project Assistant (USA)

www.projectassistant.org

May 2024 – December 2024

Senior Backend Engineer (Laravel) - Travel & Tourism Booking Platform

www.hawaii.com

- Developed booking engine APIs for tour packages, hotel reservations, and activity bookings in Hawaii tourism market
- Built payment processing systems integrating with Stripe and other payment gateways for secure transaction handling
- Created inventory management for tour availability, hotel room allocation, and real-time booking confirmations
- Implemented dynamic pricing algorithms based on seasonality, demand, and package configurations
- Developed booking workflow systems with confirmation emails, itinerary generation, and customer communication
- Built multi-vendor integration connecting local tour operators, hotels, and activity providers through unified API
- Created reporting dashboards for booking analytics, revenue tracking, and vendor performance metrics
- Implemented search and filtering for tour packages with location-based results and availability checking
- Developed customer management with booking history, preferences, and loyalty program integration

Auxilia Digital (United States)

www.auxilia.digital

Software Engineer (Laravel, VueJS, Wordpress) / Full Stack Developer

July 2022 – April 2024

Software as a service (Saas) development & Digital Agency Company

- Back-end PHP skills using Laravel for MVC Framework, Front-end Javascript using JQuery, VueJS, ReactJS, Wordpress for CMS. CSS3, HTML, Bootstrap, Tailwind. Creating packages, integrating packages,

customizing themes, creating custom functions, editing or making Plugins

- API Development and Integration
- Database Management
- Develop new features for the app with design patterns in mind and in test driven development workflow.
- Maintain and refactor codebase to adapt new technologies and easily integrate other third-party services.
- Develop API's to be used by enterprise clients and other successful SAAS companies.
- Programming in PHP as back-end and VueJS as front-end with Docker as local development environment.

React Digital (Dubai, UAE) 
www.react-digital.com

Laravel Developer / Full Stack Developer

September 2017 – February 2019

Software as a service (Saas) development company & Digital Communications Agency

- Back-end PHP skills using Laravel for MVC Framework, Front-end Javascript using JQuery, VueJS, ReactJS. CSS3, HTML, Bootstrap, Tailwind. Creating packages, integrating packages.
- Develop new features for the app with design patterns in mind and in test driven development workflow.
- Maintain and refactor codebase to adapt new technologies and easily integrate other third-party services.
- Develop API's to be used by enterprise clients and other successful SAAS companies.
- API Development and Integration
- Database Management
- Programming in PHP as back-end and VueJS as front-end with Docker as local development environment.
- Refining a legacy application coded by a previous engineer, enhancing performance, and promptly fixing bugs as required.
- Utilizing Laravel within a modern tech stack elevates application quality, architecture, and maintainability, leveraging its robust features,

expressive syntax, seamless integration with contemporary technologies, and built-in tools for testing and security.

Edge Innovation (Dubai, UAE)
www.edgeinno.com

Laravel Developer / Full Stack Developer

July 2015 – December 2016

An Innovative Creative Agency & Software as a service (Saas) Development Company

- Back-end PHP skills using Laravel for MVC Framework, Front-end Javascript using JQuery, VueJS, ReactJS. CSS3, HTML, Bootstrap, Tailwind. Creating packages, integrating packages.
- Develop new features for the app with design patterns in mind and in test driven development workflow.
- Maintain and refactor codebase to adapt new technologies and easily integrate other third party services.
- Develop API's to be used by enterprise clients and other successful SAAS companies.
- API Development and Integration
- Database Management
- Programming in PHP as back-end and VueJS as front-end with Docker as local development environment.
- Refining a legacy application coded by a previous engineer, enhancing performance, and promptly fixing bugs as required.
- Utilizing Laravel within a modern tech stack elevates application quality, architecture, and maintainability, leveraging its robust features, expressive syntax, seamless integration with contemporary technologies, and built-in tools for testing and security.

Renegade Empire (Melbourne, Australia)
www.renegade-empire.com

**RENEGADE
EMPIRE**

Wordpress Developer / Full Stack Developer

August 2013 – September 2015

February 2019 - November 2021

Building Brands, Websites and Online Shops

- Back-end PHP skills, Wordpress for CMS. Front-end Javascript using JQuery, VueJS, ReactJS. CSS3, HTML, Bootstrap, Foundation. Customizing themes, creating custom functions, editing or making Plugins.
- Developing websites using my Key Skills.
- Adobe Photoshop Slicing, Cropping, Enhancing, etc. for Images.
- Converting PSDs to Wordpress themes.
- Handle Clients Projects, Agreement and Contracts.
- Integrating E-commerce website (Woocommerce).
- Integrating APIs

Wpdevph (Wordpress Experts in Philippines)

(Cebu, Philippines)

<http://wpdevph.com>

PHP (Wordpress Developer) / Full Stack Developer

September 2012 – November 2013

- Wordpress Developer, customizing themes, creating custom functions, editing or making Plugins.
- Developing websites using my Key Skills below.
- Adobe Photoshop Slicing, Cropping, Enhancing, etc. for Images.
- Converting PSDs to Wordpress themes.
- Handle Clients Projects, Agreement and Contracts.
- Integrating E-commerce website.
- Integrating APIs.

Education

University of San Jose Recoletos

Bachelor of Science in Information Technology

October 2010
